"name": "Vrishchikasana",

"sanskrit_name": "वृश्चिकासन",

"translation": "Scorpion Pose",

"method": "Begin in forearm stand position with forearms on ground. Slowly bend knees and arch back, bringing feet toward head. Advanced pose requiring practice.",

"benefits": "Strengthens arms, shoulders, and back; improves circulation; stimulates digestive organs; helps with parasitic infections; strengthens immune system."

},

{

"name": "Matsyendrasana",

"sanskrit_name": "मत्स्येन्द्रासन",

"translation": "Lord of the Fishes Pose",

"method": "Sit on ground and place left heel under right thigh. Take right leg across folded left leg, placing foot flat near left knee. Push right leg pressing abdomen with left hand, touching right foot. Twist

waist rightward, bringing chin level with right shoulder. Take right hand behind back and touch right thigh. Hold briefly, return to start, and repeat on other side.",

"benefits": "Helps with backache, digestive disorders, liver problems, diabetes, kidney disorders, and obesity; helps expel intestinal parasites; improves digestive function."

},

{

"name": "Mayurasana",

"sanskrit_name": "मयूरासन",

"translation": "Peacock Pose",

"method": "Stand beside a table and place hands firmly on top. Fold elbows to touch near navel.

Exert weight on hands by lifting body to 180°, holding 40-50 seconds. Alternative: On ground, affix hands with elbows at sides of navel, lift body with weight on hands. Hold 40 seconds, gradually increasing duration. Return slowly to start position.",

"benefits": "Increases digestion and appetite; strengthens intestines; relieves constipation and indigestion; helps with liver and kidney disorders; can neutralize poison effects; helps eliminate parasites and worms."

{

"name": "Bhujangasana",

"sanskrit_name": "भुजंगासन",

"translation": "Cobra Pose",

"method": "Lie face down with abdomen touching ground. Straighten arms with palms on ground beside abdomen. Slowly lift neck and torso so body rests on palms. Lift neck upward and look up as far as comfortable. Keep toes and palms on ground, elbows straight. Hold as long as possible, then slowly return to start position and relax.",

"benefits": "Improves blood circulation to abdominal muscles and back; supplies fresh blood to all organs; strengthens spine; helps with menstrual disorders; improves digestion; prevents night discharge; maintains celibacy; useful for diabetics by activating pancreas to secrete insulin; makes arms, hands and neck flexible; strengthens kidneys and intestines; reduces obesity and abdominal fat; improves reproductive health."

},

{

"name": "Shirshasana",

"sanskrit_name": "शीर्षासन",

"translation": "Headstand Pose",

"method": "Kneel on the ground. Bend forward and place arms on the ground at right angles with fingers interlocked. Place head in palms and raise legs slowly until balanced vertically on head. Start with 30-60 seconds and gradually increase to 5-10 minutes with practice.",

"benefits": "Called the king of asanas; invigorates and energizes; purifies blood; helps cure liver, spleen, lung and urinary system diseases; improves digestion; helps with uterine and ovarian diseases; improves memory and eyesight; increases blood supply to spinal cord; enhances sexual energy; energizes nerves; helps with sterility."

{

```
"name": "Sarvangasana",
"sanskrit_name": "सर्वांगासन",
"translation": "Pan Physical Pose",
"method": "Lie flat on the ground, spine touching the floor. Raise legs slowly to a right angle with the trunk. Gradually rise up the body without jerking the spine. Use hands for support, fingers outward and thumbs towards belly. Raise the back until the trunk is at 90° with weight on shoulders and neck. Take legs slightly forward and press chest with chin. Hold for a few seconds, then return to starting position.",
"benefits": "Cures constipation, dyspepsia; affects thyroid gland positively; tones nervous system and body limbs; preserves semen; helps with intestinal disorders, varicose veins, appendicitis; makes spine flexible; removes throat disorders; expels gas; gives glow, vitality and strength; increases sexual power; helps with menstrual disorders; improves reproductive health."
},
{
  "name": "Matsyasana",
  "sanskrit_name": "मत्स्यासन",
  "translation": "Fish Pose",
  "method": "Sit in padmasana then lie back. Catch big toes with hands and raise back portion gradually. Keep backside of head and knees touching the ground. Retain breath as long as possible in final position, exhale when returning.",
  "benefits": "Strengthens chest and lungs; removes hip fat; strengthens legs and hands; helps with asthma; relieves constipation; improves reproductive health; helps with frigidity and sterility."
